Greeta, Mother Nature is dying to sustain us. (January 5, 2020)

THE BIG TAKEAWAY

PHOTOGRAPH BY ENRIC SALA

Save nature, save yourself: If you can't summon feelings for other beings, maybe you should think selfishly about nature. That's the message from oceanographer and National Geographic Explorer **Enric Sala**. Why? If wildlife habitats are degraded, animals get stressed and shed viruses more rapidly. That issue should be top of mind as we concern ourselves with limiting COVID-19's reach and stopping the next animal-to-human transmitted pandemic, Sala writes in an essay in the latest *National Geographic* magazine. Sala's work has prompted a book and recognition as a finalist for a MacArthur grant. *Above, a wave breaks over the reef crest at Kingman Reef, part of the U.S. Pacific Remote Islands Marine National Monument.*
